                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Sequence 12, Application US/09147142
Sequence 12, Application US/09147142
Patent No. [US2002001849A]
GENERAL INFORMATION:
APPLICANT: HUDSON, Peter John
APPLICANT: RIVING, ROBERT Alexander
APPLICANT: RIVING, ROBERT Alexander
APPLICANT: RIVING, ROBERT Alexander
APPLICANT: ATWELL, John Lessile
TITLE OF INVENTION: HIGH AVIDITY POLYVALENT AND POLYSPECIFIC REAGENTS
FILE REFRENCE: 016786/0212
CURRENT FILING DATE: 1999-03-05
EARLIER APPLICATION NUMBER: BCT/AU98/00212
EARLIER APPLICATION NUMBER: AU PO 5917
EARLIER FILING DATE: 1999-03-05
SOFTWARE: PRACEICATION NUMBER: AU PO 5917
EARLIER FILING DATE: 1999-03-05
SOFTWARE: PRACEIL NOS: 32
SOFTWARE: PRACEIL VET. 2.0
SSOT ID NOS: 32
LENTH: 45

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
